

**“If your sprayer nozzle is 2 years old you are probably spraying more liquid than you need and that’s costing you money”**

*Bill Robinson*

*Happy Holidays!*

**The end of the year is a good time to clean up for next year...**

**1 Inspect all the tank sprayers.** Go ahead and replace the pump tube gasket (at the top of the pump tube) and the check valve—if 2 years old, they are near the end of their service life.

**2 Replace the nozzle.**

If it is 2 years old the opening has become larger (brass is a soft metal) and you are spraying more liquid than you need—and that’s costing you money.

Worn tips over-apply chemical which cuts profit without killing more pests

**3 Clean the mesh strainer at the base of the valve.**

When’s the last time you did that? Keep this clean and it will keep the valve clean.

Get more life out of your valve and tip with periodic cleaning of your mesh screen

**4 Empty the hand dusters.**

Don’t leave dust in them for long periods. Throw in some grains of rice to gather up the moisture while they are sitting in the back of the service truck.

**5 Rinse and scrub (inside) the tank of the foamer,** and flush the tip. Use cold water.

**6 Drain the termite hose.** When the termiticide sits in the hose for long periods it can leave a residue.

**7 Rinse the fogger tank** and flush the nozzle with clean water. Open the nozzle to power mist and spray for 1 minute, then close the nozzle, then turn of the motor.

**8 Collect all the B&G Bulb Dusters** and all the plastic extension tubes...including the tubes scattered in the service trucks (check the dashboard). Put all the ‘extra’ tubes inside a spare bulb duster, so you’ll know where to find them.

**9 Empty the Electric Granular Applicator.** Don’t leave those granules in the tank for a long period, they will collect moisture.

# Will your equipment be ready for the start of the 2010 season?

Save this handy parts guide to help eliminate downtime!

Always keep extra parts on-hand to keep production moving

**Keep your sprayer trouble-free to reduce production time and eliminate waste**

## 22049625 SPRAYER MAINTENANCE KIT

Keep your B&G clean and operating smoothly with the Sprayer Maintenance Kit specially designed to clean stainless steel and brass components without voiding your warranty.

## 22049482 GREEN TOP

## 22049483 GREEN BOTTOM

Turn your sprayer green with this easy to install 'retro-kit' (use the 2 part numbers shown above)

**Green Retrofit!**

## 22050100 GD-124 GASKET KIT

Contains most parts needed to rebuild your pump assembly and Extenda-Ban™ valve on one sprayer.

## 22050400 FA-600-D KIT FIRST AID KIT

This is the kit you need if you are servicing 3-4 sprayers with minor pump assembly or Extenda-Ban™ issues.

## 22049452 5800 Tip

Your tip is wearing each time you use it. Spray is abrasive and both enlarges the orifice and changes the fan pattern. Order one today if your tip is over 2 years old.

**Termite season is just around the corner! Get your termite tools ready for the season to maximize profits**

## 22067554 VERSAGUN REPAIR KIT includes

- 1 22067503 Adapter 1/2-20
- 1 22067514 Locknut, Versagun
- 1 22067517 Seal, Versagun

## 22028910 VERSATOOL REPAIR KIT includes

- 1 TN-45 22040500 Trigger nut
- 1 VT-616 22059500 Spring lock
- 1 VT-621A 22060000 Valve seat gasket
- 1 VT-622A 22060100 Seat gasket holder
- 1 1138 22071038 Space
- 2 1-1964 33000090 O-Ring

## 22071366 SSI-4/SSI-14 REPAIR KIT includes

- 2 1-1964 33000090 O-Ring
- 4 1-1935 33000022 O-Ring
- 4 1282 22071192 Seat Gasket
- 1 1147 22071047 O-Ring

Don't forget to order extra tips and soil rods!
