FEATURED PRODUCTS

No matter the size or location of your space, indoors or out, our products are proven to perform now, when you need them most, and for years to come. We make our products with intention—to be more efficient, more accurate and more user-friendly.

PRIMELINE INDOOR/OUTDOOR

The B&G Primeline sprayer is designed for precision-control spray patterns, making it ideal for target-surface disinfection. Made for years of dependable service, this iconic hand-held sprayer is multipurpose and the first choice of professionals in many trades, including disinfection, pest and vector control, concrete, odor control and more.

HURRICANE ES INDOOR/OUTDOOR

This premier hand-carry ULV fogger uses electrostatic technology to charge each droplet, providing uniform coverage on the target surface every time. The Hurricane ES can quickly and efficiently disinfect critical, high-touch surfaces such as handrails and doorknobs, without the need to wipe down the surfaces afterward, saving you time. It's precise, powerful and perfect for indoor and outdoor disinfection jobs, as well as vector and pest control.

TORNADO INDOOR

The Tornado fogger features a sizable 3-gallon tank to help you manage larger disinfection jobs without having to refill often, while still being hand-carry. This fogger's extra capacity is great for treating large indoor and outdoor industrial spaces. It's also equipped to handle pest control, vector control and other industrial applications.

VERSA-FOGGER OUTDOOR

Portable and powerful, Versa-Fogger is designed for a wide variety of outdoor applications from disinfection to mosquito and insect control. With mobility, range and precision, this backpack fogger fully covers every target and is an ideal choice for large and varied disinfecting jobs. Its heavy-duty construction, along with a deluxe backpack harness, will give you years of dependable service.

MINI-LITE OUTDOOR

Light, affordable and handy, the Mini-Lite is the ultimate portable fogger. Designed for comfort and ease of use, this fogger produces adjustable flow rates to accommodate any indoor or outdoor disinfecting job. Built to aircraft tolerances to achieve lightweight, superior performance, the Mini-Lite can be easily mounted on a small open utility vehicle or portable cart for large-scale disinfection, as well as outdoor vector control.

DYNA-JET L-30 INDOOR/OUTDOOR

Cover more ground with the Dyna-Jet L-30 truck-mount ULV fogger. This powerful yet compact battery-operated ULV fogger is perfect for highly populated indoor or outdoor industrial spaces. With a quiet battery, wide plume and accurate rotary atomizer, you can cover large areas with small droplets that evaporate quickly for effective and efficient disinfection.
